

A teal-colored circle with a scalloped, wavy edge, centered on a dark blue background.

# ShURL

URL Shortener

# What is ShURL?

- ShURL is URL shortener
- Allows you to replace long links with short ones

# Why to use ShURL

- Completely free
- Easy to use
- Without advertisements
- Registration available
- Unlimited links creation

# How ShURL works

- ShURL takes long link and saves it into database
- Seven random characters will be assigned to the long link
- These seven character works as a new shorter link
- You can registrate:
  - you have your own shortened links
  - you can add, edit or delete your links
  - you can see, how much are your links used

# Problems

- Generating short links and saving to the database
- Registration and administration of users accounts
- Design
